Hesham Abas

About Our Company

Quality

AA is committed to the highest level of quality. That's why we select the best components and industry-leading performance models to ensure your system will produce optimally. Our highly-trained installation crews take pride in delivering beautiful well-made solar arrays. From the panels to the bolts on the roof, we'll deliberately consider every piece of your installation so you can rest easy throughout its many years of service.

Professional

Your experience is central to each part of our business. We'll manage every part of the design and installation of your project with professionalism and care. We recognize the importance of home improvement projects and AA has made a name for itself by consistently making our customers happy.

On Time

We believe that a quality installation is worth spending extra time and not cutting corners, and we also believe in the value of following through on your commitments. We won't promise to deliver the fastest installation on the market, but with all our experience delivering solar installations we know how to come through on-time and on-budget.

Your Current Utility Bill

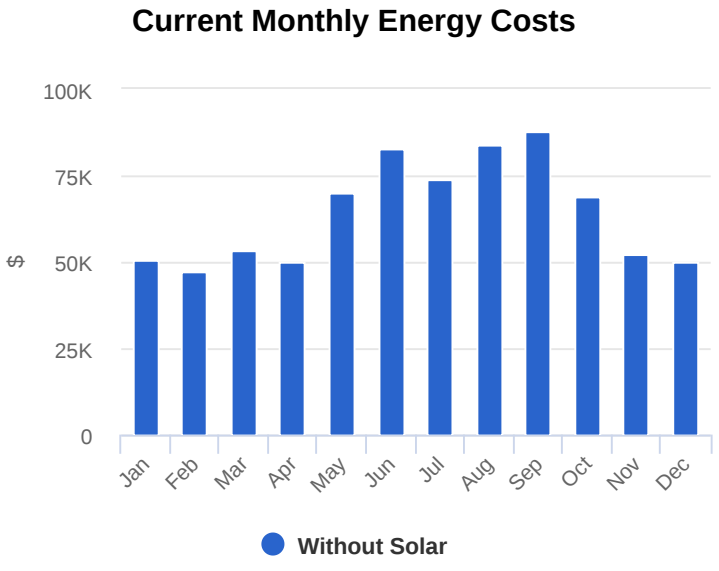

Expensive

Paying for utility power is essentially renting your power. The utility gets to set the price, and costs continue to increase over time. Solar energy gives you a new, more affordable way to manage your energy costs.

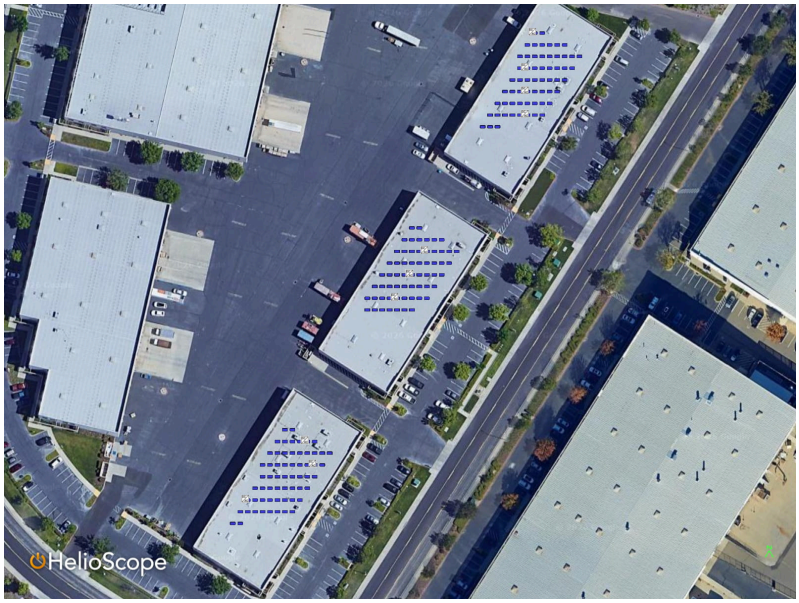

$64,205.59	$770,467.14	$32,086,803.67
Average Monthly Electric Bill	Annual Electric Bill	25-Year Electricity Cost

Unpredictable & Outdated

The cost of generating electricity from traditional sources keeps going up as power generators have to dig for more and more challenging sources of energy. In addition to the huge environmental costs, fossil fuels are projected to get more expensive over time.

Your System Design

Details

Modules	**(180) Jinko**
Inverters	**(10) Sungrow**
System Size	**68.40 kW DC**
Annual Energy Production	**118.50 MWh**
Energy Offset	**6.21%**
Utility Bill Offset	**1.86%**

Pricing

Upfront System Pricing:	$173,052.00
Incentives:	$51,915.60
Net System Cost	**$121,136.40**

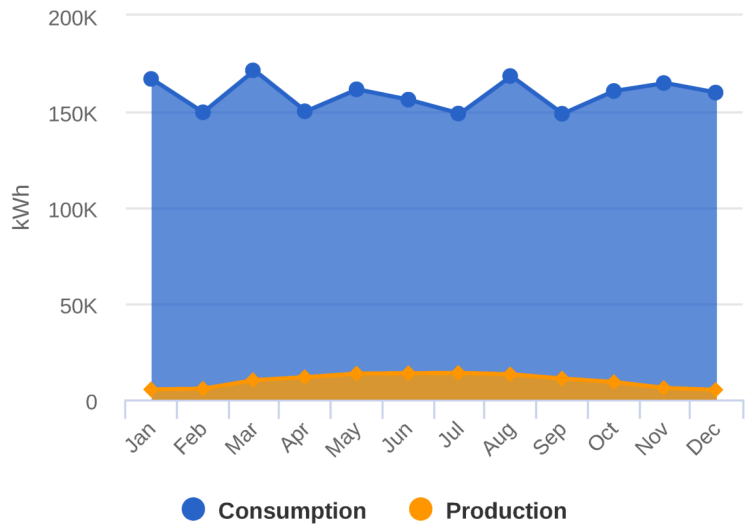

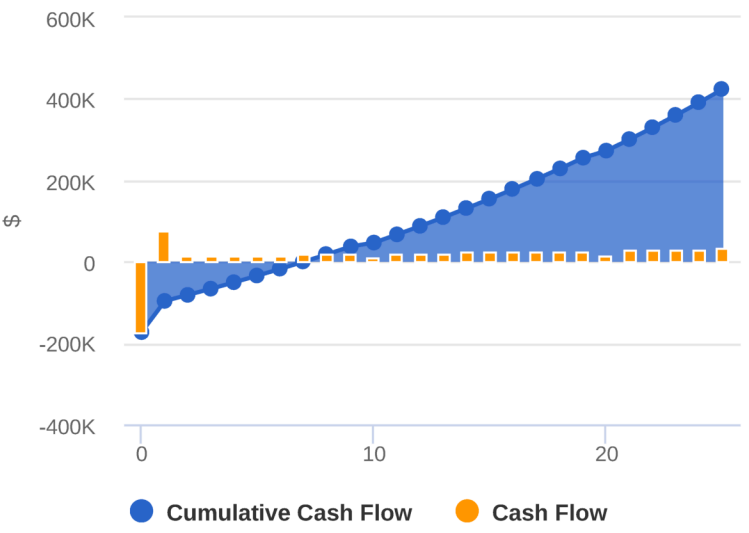

Financial Analysis

7.0 years	$49,974.01	245.21%
Payback Period	Net-Present Value	Return on Investment

Usage vs. Solar Production

Lifetime Cashflow

Cash Flow Analysis

P50 Year 1 Yield **1,733 kWh/kWp**
Average PV Degradation Rate **0.50%**
Average Annual Utility Escalation **4.0%**

Discount Rate **10.0%**
Lifetime Value (NPV) **$49,974.01**
Payback Period **7.0**

Year	P50 Energy (kWh)	System Cost	Utility Bill Savings	Incentives	Cash Flow	Cumulative Cash Flow
0	0	-$173,052	-	-	-$173,052	-$173,052
1	118,504	-	$14,306	$62,299	$76,604	-$96,448

Environmental Impact

Your solar array is a significant benefit to the environment. The following metrics help to quantify equivalent offsets:

843,343.7

Gallons of gasoline consumed

75,190.9

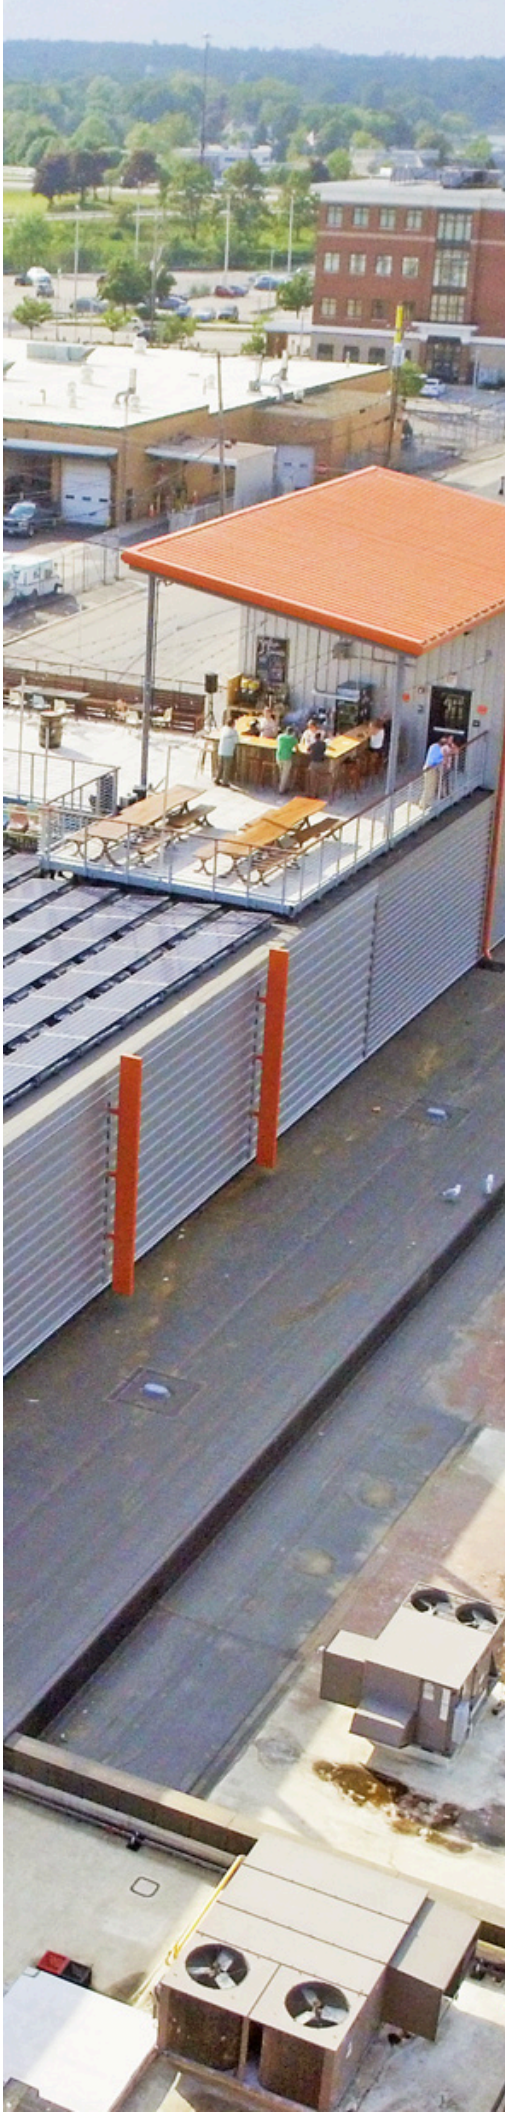

Lighbulbs switched to LEDs

325,827.3

Tree seedlings grown for 10 years

4,567.2

Barrels of oil consumed
